

Amendments to the Claims:

This listing of claims will replace all prior versions and listings of claims in the application.

Listing of Claims:

1-39. (Canceled)

40. (Currently Amended) A rinse agent composition comprising:

- (a) sheeting agent comprising nonionic block copolymer surfactant in an amount for promoting draining of sheets of water from a surface, wherein the nonionic block copolymer comprises ethylene oxide and propylene oxide units; and
- (b) humectant comprising glycerine or propylene glycol, ~~and at least one other humectant~~, wherein the humectant comprises a material that contains greater than 5 wt.% water when the humectant is equilibrated at 50% relative humidity and room temperature;

wherein the sheeting agent and the humectant are different and the weight ratio of the total amount of humectant in the rinse agent composition to the total amount of sheeting agent in the rinse agent composition is greater than 1:2, and wherein the rinse agent composition, when provided as an aqueous rinse containing an active materials concentration of 10 parts per million to 500 parts per million, reduces water solids filming in the presence of rinse water containing in excess of 200 parts per million total dissolved solids compared to an aqueous rinse not containing the humectant.

41. (Previously Presented) A rinse agent composition according to claim 40, further comprising a pH adjusting agent including citric acid.

42. (Canceled)

43. (Previously Presented) A rinse agent composition according to claim 40, wherein the nonionic block copolymer further comprises a number average molecular weight of between about 1,500 and about 100,000.

44-46. (Canceled)

47. (Currently Amended) A composition comprising:

- (a) at least 10 wt.% sheeting agent comprising polyoxyethylene-polyoxypropylene block copolymer; and
- (b) at least 10 wt.% humectant comprising glycerine or propylene glycol, ~~and at least one other humectant~~, wherein the humectant comprises a material that contains greater than 5 wt.% water when the humectant is equilibrated at 50% relative humidity and room temperature; wherein the weight ratio of the total amount of humectant to the total amount of sheeting agent is about 1:3 to about 1:1.

48. (Previously Presented) A composition according to claim 47, wherein the polyoxyethylene-polyoxypropylene block copolymer has a number average molecular weight of between about 1,500 and about 100,000.

49. (Previously Presented) A composition according to claim 47, wherein the polyoxyethylene-polyoxypropylene block copolymer has the formula:

wherein EO is an ethylene oxide group, PO is a propylene oxide group, x is about 10 to about 130, y is about 15 to about 70, and x+y is about 25 to about 200.

50. (Previously Presented) A composition according to claim 47, wherein the polyoxyethylene-polyoxypropylene block copolymer has the formula:

wherein EO is an ethylene oxide group, PO is a propylene oxide group, x is about 10 to about 130, y is about 15 to about 70, and x+y is about 25 to about 200.

51. (Previously Presented) A composition according to claim 47, wherein the polyoxyethylene-polyoxypropylene block copolymer has the formula:

wherein EO is an ethylene oxide group, PO is a propylene oxide group, x is about 10 to about 130, y is about 15 to about 70, and x+y is about 25 to about 200.

52. (Previously Presented) A composition according to claim 47, wherein the composition comprises less than about 50 wt.% humectant.

53-55. (Canceled)

Support for Amendment

Independent claims 40 and 47 are amended to characterize the humectant as comprising glycerine or propylene glycol. This amendment is supported by the specification at, for example, page 3, lines 16-25. In addition, the amendment cancels previously presented claims 53-55.

No new matter is introduced by this amendment, and entry thereof is requested. Upon entry, claims 40, 41, 43, and 47-52 are active in this application.
